

# Sub-Niche Success Website Pages Templates

Sub-niche sites are pretty simple constructions. They only contain 4-5 pages.

The sales page is really the only page that will take some effort on your part. The rest is pretty easy.

Here are the pages that each of your sub-niche sites should contain:

- Sales Page (which is the "Home" page)
- "Thank You" page
- Contact page
- Legal Pages
- References Page

The sales page templates are contained in their own section. And for the Legal Pages I recommend you use the Legal Suit Pro plugin (it automatically sets up all of your necessary legal pages with the click of your mouse... plus, it's cheap!) So the templates below cover the "Thank You" page, the Contact page, and the Reference Page.

## The “Thank You” Page Template

# Thank you for your purchase! You've made an EXCELLENT decision!
